InstaCradles have many benefits.

On-site levelling

Excellent acoustics

Creates a cavity for services

Protects surface below

60

Year guarantee

Allows wood to expand & contract

Adjustable for varying deck heights

quick, easy & cost-effective

InstaCradles are sustainable and circular!

Reusable & recyclable

Made from recycled rubber tires

Supports the circular economy

Here's how it works...

DECKING CRADLES

The base of the system
Varies from 35mm - 60mm

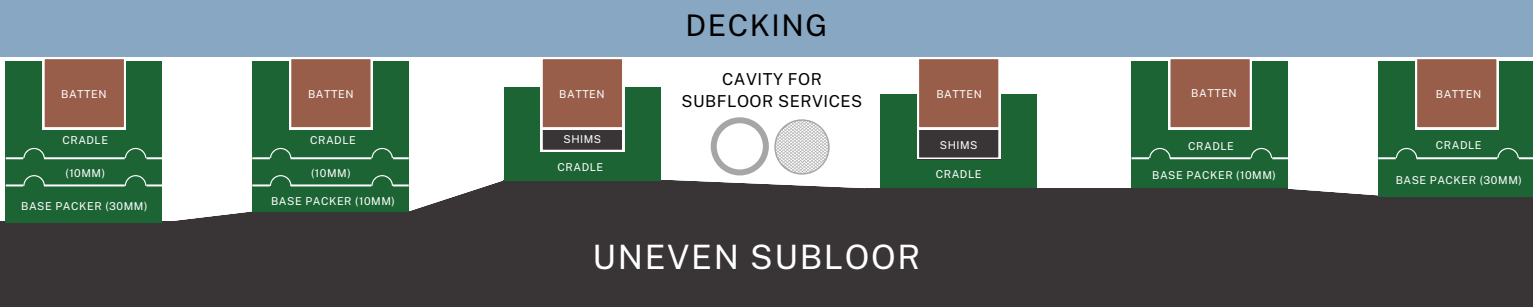

BASE PACKERS

To adjust floor heights
10mm and 30mm variations

SHIMS

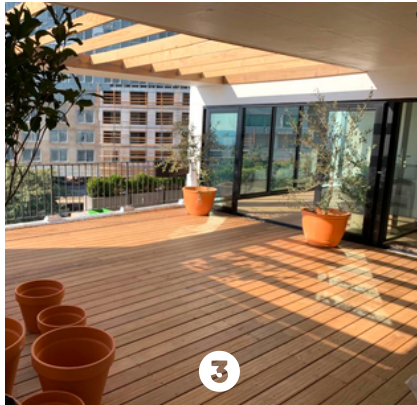

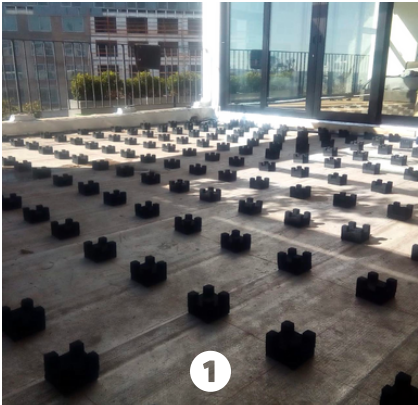

For micro-leveling
2mm and 5mm variations

Cradles are laid across the subfloor. A support batten is inserted loosely into the cradles and the chosen decking material is then fixed directly to each batten with traditional clips and fixing brackets.

The Cradle system is designed to take a **uniformly distributed load of 5kN = 509kg**. This load can be increased because of the system flexibility.

Max height: 300mm
Min height: 60mm

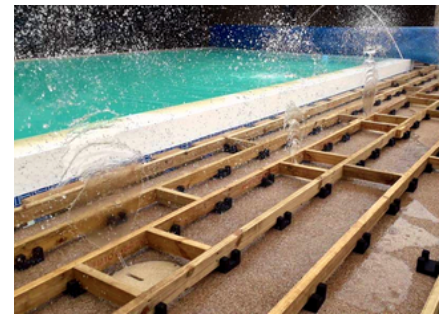

Creates space for subfloor services.

Protects waterproofing below.

Opportunity for special features
